 Utica Inc., John O'Hara Co.

Summary of Project and Services:

JS&A provided Owner Representative / Construction Management services for the planning, design and construction of partially completed residential and commercial building structures in existing schools of technical training.

The purpose of these structures is to offer a live workshop for instruction in electronic wiring (data, AV, telecom) of such facilities.

Services included project scope development, phasing and staging plans, cost estimating and scheduling, and continued through design phase coordination, general contract packaging, and construction oversight.
