Summary of Project and Services:

JS&A provided Owner Representative / Construction Management services for the planning, design and fit-up of classrooms and labs for Pharmaceutical instruction in existing schools of professional training.

Each location is upgraded with a specialized pharmaceutical classroom teaching facility, with construction costs averaging \$100,000 per location.

Services included project scope development, phasing and staging plans, cost estimating and scheduling, and continued through design phase coordination, general contract packaging, and construction oversight.
